

OUR VISION

To supercharge companies worldwide with AI & Machine Learning, pushing beyond conventional boundaries and offering groundbreaking approaches to business challenges.

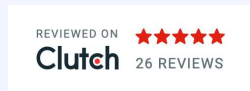

General presentation about us, services & case studies

About us

Our services focus on **AI Consulting, Data & Machine Learning Engineering, and AI Software Development**, specializing in ChatGPT, Google BigQuery, Vertex.ai, Python, Kotlin, Google Cloud Platform and Terraform.

We are one of the fastest-growing technology companies, awarded with the **Deloitte Fast 50** Central Europe title. We currently work with clients from **the US, the UK, Sweden and Norway**.

5 reasons to work with us

1.

At Stepwise, we stand out in the **practical applications of AI and Machine Learning**, offering straightforward solutions to your business needs.

2.

Each member of our team is a **business-minded individual**.

3.

Our Data Science team is led by a PhD expert who has crafted their skills on Twitter's algorithms.

4.

We are your GUIDE in a rapidly evolving AI environment. With us, you're not just buying services – you're investing in a long-term partnership.

5.

Our C-level executives are actively involved in the building process, contributing their invaluable insights.

Meet our C-level

Kris Szukiec
CEO

Radek Grebski
CTO

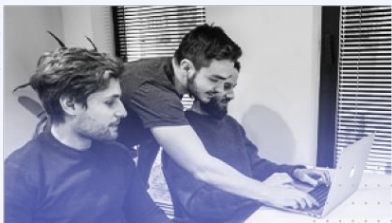

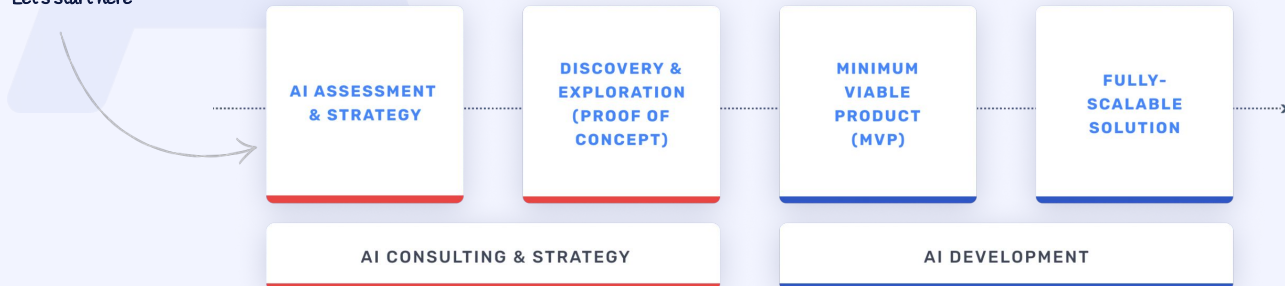

Raf Gorzkowski
CIO

Our services

We provide a full-cycle AI & Machine Learning Development process - from Consulting, through Engineering to validate ML models, and ending with AI Software Development & Implementation.

All under one roof!

Let's start here

Hire The Elite Team

The Elite Team concept is based on the principles of creating and executing projects by a highly specialized technical team with strong business competencies. [We offer a group of 5-15 engineers with regular and senior competencies, supervised by a CTO, CIO, and a Solution Architect.](#) It is essential in such a complex domain like AI & ML.

5 principles of the Elite Team

1 Business always comes first

Each of our technologists uniquely combines business insight with coding skills, ensuring that technology is only a means to achieve company objectives.

2 Project outcomes quantified

Success metrics are carved in stone from the get-go, aligning our sights with your strategic skyline.

3 Communication is our top skill

Sharpened through coaching sessions, we ensure our team members can translate your vision into the language of AI.

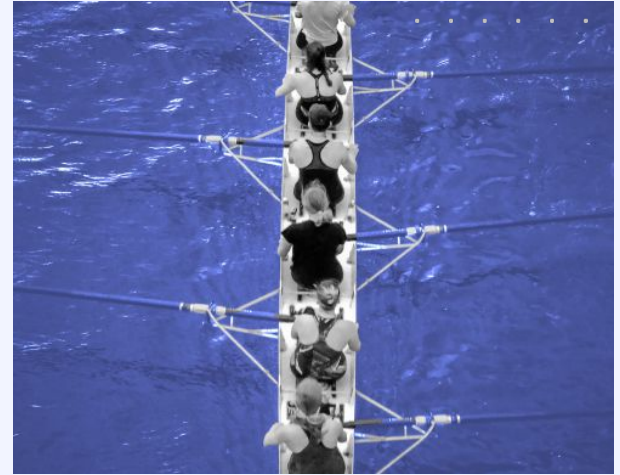

4 Data Science, Backend, Cloud - Our Three Core Strengths

Success metrics are carved in stone from the get-go, aligning our sights with your strategic skyline.

5 C-level actively involved in projects

Our top executives are in the building process, contributing their invaluable insights (project setup & ongoing expertise).

Our case studies

FINTECH

AI Platform for risk decision engine

<https://stepwise.pl/case-studies/smart-fintech-platform/>

Challenge

Create from scratch a SaaS platform that supports loan and credit businesses with the use of a decision-facilitating and scoring engine. Advanced tools to support Business Process Management in the financial industry using AI and ML mechanisms.

Client

Self Learning Solutions (SLS) is a technology company providing software for FinTechs to automate and orchestrate business workflows with low-code/no-code (LCNC) solutions.

Results:

- 78% cost reduction on new features IT Development of Smart Fintech Platform.
- 80% maintenance costs reduction.
- 51% infrastructure cost reduction thanks to Cloud.

Two aspects of our cooperation are the most impressive. The first is their technical knowledge and the quality of work they deliver. The second is their approach to software development. They do the right things in the right order, and their lean approach is perfect for launching innovative ideas.

Karol Dziasek, CEO, Self Learning Solutions

Our case studies

Here is a selection of our case studies ([see our full list of cases](#)).

INDUSTRY 4.0 & MANUFACTURING

Optimisation of production line parameters with VertexAI

<https://stepwise.pl/case-studies/machine-learning-for-industry-4-0/>

Challenge

Creation of an algorithm that, using the available data, optimises the production process, speeds up machine changeovers and assists the operator team. External parameters such as temperature, type of raw material used in production and humidity had to be taken into account.

Client

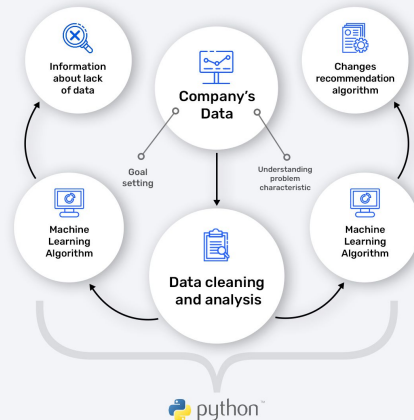

STABILIS is a startup that specialises in creating intelligent applications for Industry 4.0. Their technology is an advanced low-code development platform that allows building adaptable business applications for Manufacturing and Industry players.

Results

Our experiments have proven that VertexAI enables faster model training and optimisation than on an on-premise infrastructure. The rate of correct prediction of machine settings was 75%. Costs of future infrastructure maintenance have been reduced to the minimum.

Artificial Intelligence for Industry 4.0

Stepwise delivered a quality product, meeting the client's expectations. The team was communicative and customer-oriented, allowing them to be very understanding. Additionally, they were efficient, flexible, and proactive at problem-solving.

Platta Cezariusz, Head of Data Science, Stabilis.io

Our case studies

Here is a selection of our case studies ([see our full list of cases](#)).

RESEARCH & MARKETING

AI based market research platform with synthetic profiles

<https://stepwise.pl/case-studies/ai-based-market-research-platform/>

Challenge

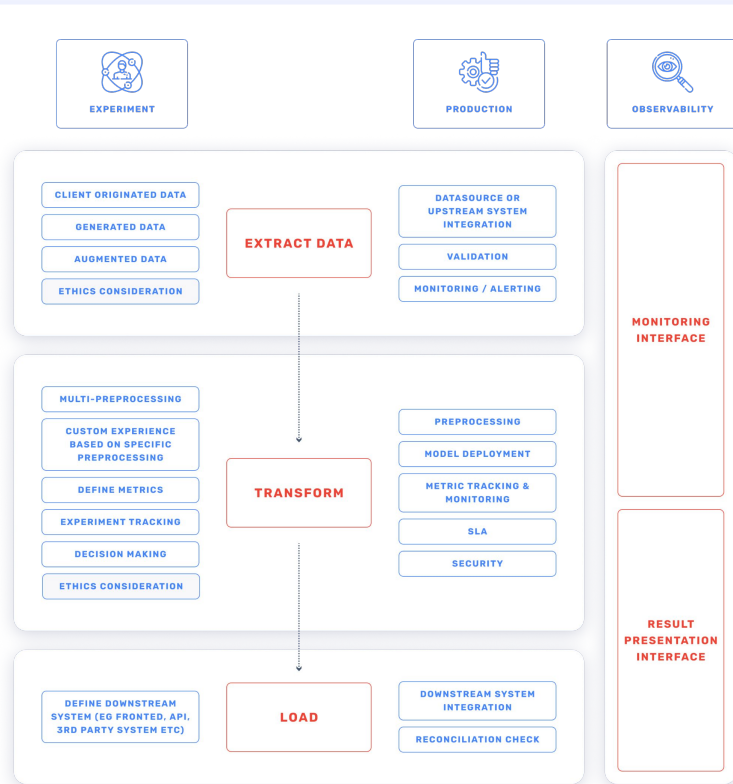

Building a versatile framework that supports both internal and external development of market research tools. Leveraging advanced AI and machine learning – create synthetic profiles representative of diverse social groups and enable cost-effective, cross-sectional market research solutions for smaller companies and entities.

Client

Our US-based client is an investment group that specializes in the expansion of technology-driven companies in the consumer insights and marketing services sector.

Primary Goal: Improving Conversion Rate and Engagement

Scope: Our AI & Data Science framework (presented on the right) was used in the project rests on three fundamental pillars: the Observability Framework, the Experiments Framework, and Production.

We delivered over 35 successful digital products

We are based in Poland, yet we have successfully cooperated with clients from all over the world. Feel free to read their thoughts:

Stephane Senkowski, CEO

Mondeca

"We can tell them to do it this way, but they'll propose a better idea if they have one."

COO

Software Solution Provider

"They're devoted, proficient developers that have mastered their technology and domain."

Gosia Wrzesinska, CEO

Coders Co.

"They collaborate with you to find the best solutions to your problems, both technical and nontechnical."

Peter Kloprogge, Co-Founder

Startup

"I was impressed by their understanding of our business leading to a more cooperative approach."

CTO, st3p.de

Ole Breulmann

"Management cares about us. Direct communication with all levels of Stepwise allows us to solve problems together fast."

Stepwise Net Promoter Score is

67*

*Bain & Co, a source for the NPS, suggests a score above 50 is excellent and above 80 is world class.
